

# SUSTAINABLE SUPPLY CHAIN MANAGMENT—P2

## WEEK 1 ASSIGNMENT

### CREATING TABLES IN POWER BI

Step1: Download powerBI desktop.

Step2: import your data source→ CSV file→ upload your sustainable supply management csv.

Step3: click load to load your CSV file.

Step4: click to transform data i.e power query editor that helps in transforming data, delete any rows and columns, merging data, creating tables etc.

Step5: now you can see the data in tabular view→ right click the data to create a duplicate→ rename the name as inventory table.

Inventory Table:

1. Product type
  2. SKU
  3. Availability
  4. Number of products sold
  5. Customer demographics
  6. Stock levels
  7. Lead times
  8. Order quantities
  9. Lead time
  10. Revenue generated
- 

I

Step6: look for all the attributes required for the inventory table and delete other columns which are not necessary.

Step7: you can delete a column by right clicking the particular column and click delete.

Step8: now you have created the inventory table.

Step9: follow the same process to create supply chain table with columns as shown:

#### Supply chain table

1. Product type
2. SKU
3. Price
4. Availability
5. Number of products sold
6. Revenue generated
7. Customer demographics
8. Stock levels
9. Lead times
10. Order quantities
11. Shipping times
12. Shipping carriers
13. Shipping costs
14. Supplier name
15. Location
16. Lead time
17. Transportation modes
18. Routes

Step10: create manufacturing table in the same way as previous tables with columns:

#### Manufacturing table

1. Product type
2. SKU
3. Production volumes
4. Manufacturing lead time
5. Manufacturing costs
6. Inspection results
7. defect rates

Step11:click onto the close and apply button in top left corner. The tables have been created and viewed in canvas.

Name Inventory Table
